Summary

I am Diego Alves, working full time as a senior full stack developer in web development .

I have a big passion to help others with my web technologies.

I have 7 years+ experiences in web development and have worked with small, medium and large businesses across US and Europe with different industries and types building small-large scaled websites and applications. I see technologies not only from a technical point of view but also a business point of view.

I am a problem solver and I am proficient in troubleshooting any challenges I come across.

I look forward to working with you and helping to grow your businesses digitally with world-class experience.

Experience

Senior Full Stack Developer

BlueNotary

04/2022 - 04/2023

- Working closely with senior stakeholders to understand business requirements and help translate these into technical requirements for the development team.
- Led Cadence developer to build Tokenization on the Flow-Cadence network chain.
